

Intermediate Referee Observer Recommended

Requirements:

To achieve the best experience for referees in Area 1H. The highest available assessors or observers should be used for intermediate observations.

Recommended:

1. If possible, be a referee assessor.
2. Referee assessor candidate.
3. Advanced referee with RRA approval. No candidate will be refused an observation if the above is not met, as long as the observer meets the requirements outlined in the National Referee Program Manual. The above recommendation is to achieve a higher level of mentoring during the observation.
